

Smoke Wizard GLD-40: Next-Generation Features Meet New OEM Requirements

The Smoke Wizard GLD-40 has a microprocessor, flow meter, and other features that meet or exceed the latest automaker testing requirements.

The advanced microprocessor manages cutting-edge pressure/vacuum-decay monitoring to meet the latest OEM EVAP testing specifications. The easy-to-read flow meter displays even the newest .010 in. leak threshold — another aftermarket first. The unit uses OEM-approved UltraTraceUV smoke & dye solution and has shop air or inert gas capabilities.

Global Leak Detection, the Smoke Wizard manufacturer, is one of the oldest, most experienced OEM smoke machine manufacturers, serving Audi, VW, Mazda, Kia and other automakers.

Reusable Smoke Wizard Pop-it Filler Neck Adapter Saves Time, Money, and Waste

The reusable Smoke Wizard Pop-it Universal Fuel Cap Adapter (GLD034) eliminates the ongoing cost and waste of disposable seals.

To use, remove the gas cap, pop on the Pop-it, and connect a smoke machine or leak detection device. It's perfect for smoke testing and pressure/vacuum decay testing the EVAP system.

The Pop-it, made of a fuel-resistant substrate, won't crack or breakdown.

It's backed by a five-year warranty.

Global Leak Detection, the Smoke Wizard manufacturer, is one of the oldest, most experienced OEM smoke machine manufacturers, serving Audi, VW, Mazda, Kia and other automakers.

Smoke Wizard GLD-50 Small, Powerful Smoke Machine

The Smoke Wizard GLD-50 is the smallest, lightest smoke machine (10" x 5" x 8.5", 7 lbs) with the most features for a budget price.

The GLD-50 OEM-approved technology includes: shop air/inert gas capability for safe testing, UltraTraceUV smoke & dye solution ("when you see the dye, you've found the leak"), and a smoke volume control for easier leak detection. The GLD-50 quickly finds general and EVAP leaks.

Global Leak Detection, the Smoke Wizard manufacturer, is one of the oldest, most experienced OEM smoke machine manufacturers, serving Audi, VW, Mazda, Kia and other automakers.

Megatester's Small, Versatile Multitester

Megatester Inc.'s Megatester allows technicians to test 3, 6, 12, 24, 110, & 220 AC/DC un-energized circuits. It can be used to test bulbs, fuses, switches, trace wires and find bad grounds. It can trace and isolate single wires among complicated setups, test whether a circuit is closed or open, test electronics and electronic circuits without turning them on, test electrical conductivity and electrical continuity. Megatester has passed Underwriters Laboratories testing programs and comes with a lifetime guarantee.

Mohawk Lifts' Swing Arm Safety Guard

Mohawk Lifts swing arm safety head guard makes the safest lifts even safer. The swing arm safety guard is now available for two post models ranging from 7,000 10,000 lb capacities.

Mohawk's swing arm safety guard prevents mechanics from hitting or cutting their heads on hard steel swing arms. Mohawk's swing arm safety guard is easily applied with a peel and stock application.

Mohawk Lifts are proudly designed, and manufactured in the U.S.A.
